Over 5,250 Free Eye Exams Provided During the 14th Annual National Service Animal Eye Exam Event

Sight-saving eye exams were provided to animals in more than 200 cities across the U.S., Canada, Puerto Rico, and Hong Kong

MERIDIAN, Idaho – JULY 10, 2023 – With the National Service Animal Eye Exam Event operating at full capacity for the first time since COVID-19, [The American College of Veterinary Ophthalmologists](#)® (ACVO) is proud to announce that more than 5,250 free eye exams were provided during the 14th anniversary of the National Service Animal Eye Exam Event, sponsored by Epicur Pharma®. Over 270 ACVO Diplomates in approximately 200 cities in the U.S., Canada, Puerto Rico, and Hong Kong donated their time and resources this year to conduct eye exams for Service and Working Animals that provide the following services: guide, hearing assistance, drug detection, police/military, search and rescue, therapy, and those assisting people with disabilities other than blindness.

Each May, the ACVO holds the National Service Animal Eye Exam Event. Since the event's creation in 2008, ACVO Diplomates have provided over 80,000 free eye exams in hopes of catching any health issues early.

Board certified veterinary ophthalmologist, Dr. Cassandra Bliss, provides eye exam to Service Dog at 2023 National Service Animal Eye Exam Event

“We are thrilled to have served over 5,250 Service and Working Animals with free, potentially life-saving eye exams,” said ACVO Executive Director Stacey Daniel. “This event would not be possible without our Diplomates and their amazing staff, who we cannot thank enough for their donated time and dedication to helping Service and Working Animals that work so hard for us.”

Search and Rescue dogs Zip and Ry were two of the Service Animals who received free eye exams at this year’s National Service Animal Eye Exam event. Ophthalmologists at the Purdue University Veterinary Hospital had previously treated service dog Ry after discovering an iris mass that involved more of the eye than just the iris, raising concerns about potential cancer. Ry had one of his eyes removed as part of his treatment. At this year’s event, Ry was found to be cancer free and has not missed a beat as a one-eyed search and rescue dog. The Purdue University Veterinary Hospital Ophthalmologists also provided free eye exams for therapy dogs, guide dogs, mobility and retrieval dogs, and more.

The American College of Veterinary Ophthalmologists is an approved veterinary specialty organization of the American Board of Veterinary Specialties that board certifies veterinarians as ophthalmologists. The 2023 ACVO National Service Animal Eye Exam Event was sponsored by Epicur Pharma®.
